

PANKAJ

Data & Business Intelligence Analyst

+91-8950083059 | pankaj9561@gmail.com | [LinkedIn](#) | [github.com/pankajiam](#)

PROFESSIONAL SUMMARY

Results-driven Data & Business Intelligence Analyst and an AI/ML enthusiast with hands-on experience in SQL, Excel, Power BI, MIS reporting, and Python, supported by a strong foundation in algebra, statistical mathematics, and machine learning. Proven ability to clean, analyze, and visualize data to drive business insights and operational efficiency.

SKILLS

Programming & Querying: SQL, Python, NumPy, Pandas, Scikit-learn

Machine Learning: Supervised Learning, Unsupervised Learning, Regression Models, Classification Models, Clustering, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning, Decision Trees, Random Forest, XGBoost, SVM, K-Means, Naive Bayes, NLP

Data Visualization: Advanced Microsoft Excel, Power BI, Matplotlib, Seaborn

Analytical Skills: Data Cleaning, EDA, Feature Engineering, VIF/Multicollinearity Handling, Insight Generation, Descriptive Statistics

MIS & Reporting: MIS Report Generation, Dashboard Development, KPI Tracking, Data Reconciliation, Excel (VLOOKUP, Pivot Tables, Advanced Formulas), Power BI

CERTIFICATIONS

- Indian Institute of Technology Madras (IIT Madras) — NPTEL | Business Intelligence & Analytics | Elite + Silver Certificate | Funded by Ministry of Education, Govt. of India | Jan-Apr 2026 | Score: 78% | 12-week Postgraduate-level, AICTE-approved | Roll No: NPTEL26CS64S262404486
- SQL (Intermediate) — HackerRank | ID: 94491962DAEF
- SQL Certification — Skill Course | ID: SC-F24A4026BA
- Power BI Certification — Skill Course | ID: SC-C43A1643F4

PROJECTS

[End to End Student Performance Analytics](#) | Python, SQL, Power BI, Pandas

- Executed a full end-to-end analytics pipeline — from raw data ingestion and cleaning to feature analysis, insight generation, student segmentation, and interactive dashboard delivery.
- Analysed academic data of 2 schools to identify key drivers of student outcomes.
- Performed data cleaning — handled missing values, removed duplicates, standardized inconsistencies across 15 columns.
- Discovered rural students outperform urban students — a counterintuitive finding that challenges resource assumptions.
- Segmented students into At-Risk, Developing and On-Track groups to enable targeted academic interventions.
- Built an interactive Power BI dashboard with slicers for school and gender filters.

[Mobile Sales Data Dashboard](#) | Power BI

- Designed and developed an interactive sales dashboard showcasing revenue trends, top-performing products, and regional performance.
- Implemented DAX measures for KPIs including total sales, growth percentage, and average order value.
- Enabled management to monitor performance and make informed, data-backed decisions.

[IMDB Movies EDA](#) | Python | Pandas | NumPy | Matplotlib

- Performed exploratory data analysis on a large IMDB movies dataset to extract actionable insights for film industry stakeholders.
- Identified highest-grossing movies by profit and discovered films of a specific language category yielded the highest average ROI.
- Uncovered the most frequently produced genres and identified top actors by movie count using GroupBy aggregation and frequency analysis.
- Applied data cleaning, nested JSON parsing, and Matplotlib visualizations to present trends in budget, revenue, and genre distribution.

[Data Science Project](#) | Python | NLP | BeautifulSoup | NLTK | Pandas

- Built an end-to-end NLP pipeline to extract article text from 114 URLs via web scraping and compute 13+ linguistic and sentiment metrics for each article.
- Implemented web scraping using BeautifulSoup4 and Requests to extract clean article content (title + body), excluding headers, footers, and navigation elements.

- Computed sentiment metrics including Positive Score, Negative Score, Polarity Score, and Subjectivity Score using a custom master dictionary with NLTK stopwords filtering.
- Calculated readability indicators — Fog Index, Average Sentence Length, Average Word Length, Complex Word Count, and Syllable Count per Word.
- Computed additional text features: Personal Pronouns count, Percentage of Complex Words, and Word Count after stopword/punctuation removal.
- Structured and exported all computed variables into the prescribed Output Data Structure Excel file using Pandas, maintaining exact column order as specified.

[Car Price Prediction](#) | Python | Machine Learning

- Built Linear, Lasso and Ridge regression models to identify key pricing drivers for a Chinese automobile company entering the US market.
- Performed end-to-end ML pipeline: EDA, VIF-based feature selection, feature engineering, encoding, scaling, and model comparison.
- Identified brand reputation and engine size as the strongest predictors of car price; provided actionable insights for product and pricing strategy.
- Applied Lasso regularization to eliminate insignificant features, improving model generalizability and interpretability.

[Hypothetical Alien Decoding-Encoding System](#) | Python

- Built a logic-driven Python project to decode and encode hypothetical alien language patterns.
- Used dictionaries, string manipulation, and algorithmic reasoning to extract hidden patterns from encrypted text.

EDUCATION

Master of Computer Applications (MCA) — Specialization in AI/ML

Lovely Professional University (LPU), Punjab | Pursuing

Bachelor of Business Administration (BBA)

BMIET, Sonipat — DCRUST University

EXPERIENCE

Account Security & Operations Analyst — iEnergizer IT Services Pvt. Ltd.

Dec 2023 – Nov 2024

- Detected and investigated bogus, fake, and compromised user accounts through systematic data analysis and pattern identification.
- Assessed compromised accounts and executed security measures to restore account integrity and prevent unauthorized access.
- Coordinated cross-functionally with Billing, Moderation, and other departments to resolve complex account issues efficiently.
- Traced and reviewed historical user tickets to identify recurring issues and establish root cause for account anomalies.
- Delivered timely, accurate resolutions while maintaining compliance with security protocols and SLA benchmarks.

ACHIEVEMENTS & EXTRACURRICULARS

- Cleared UPSC CDS written examination, AFCAT, and Territorial Army (Officers Entry) written examination.
- Reached SSB Interview Conference Stage.
- Cleared Intelligence Bureau (IB) written examination.
- Cleared SSC CGL (Pre & Mains), Delhi Police, CRPF, and HSSC examinations.
- State-level sportsperson demonstrating discipline and competitive mindset.
- Student leader with strong teamwork and leadership experience.
